

BLESSING KWENDA

FULL-STACK DEVELOPER | DATA SCIENCE | SOFTWARE ENGINEERING

Pretoria, South Africa · +27 68 240 6775 · blessatwork@gmail.com
github.com/bless-atwork · blessatworkportfolio.web.app

PROFESSIONAL SUMMARY

Resourceful Full-Stack Developer and Data Science practitioner with a completed undergraduate Bachelor of Science in Information Technology: Data Science and a Higher Certificate in Information Systems (Software Development) from Eduvos. Ships production web products end-to-end — React/TypeScript front ends, Node.js APIs, Firebase cloud services, and secure client-facing workflows — while applying Python/R analytics, NLP, and visualisation where data drives decisions. Currently deepening cybersecurity competence through the ISC2 pathway. Comfortable owning features across product, engineering, and operations in real business environments.

AREAS OF EXPERTISE

Full-Stack & Product Development

- React, TypeScript, Vite, Tailwind CSS; modular SPAs, permission-aware navigation, real-time UIs
- Node.js, Express, REST APIs; Firebase (Auth, Firestore, Storage, Hosting); JWT and MFA (TOTP)
- SaaS CRM workflows: contacts, pipelines, projects, invoicing, notifications, client portals
- PDF e-sign / Smart Docs (PDF.js, pdf-lib); email systems (Resend, Nodemailer); RBAC & security rules

Data Science & Analytics

- Python for data science; R analytics; exploratory analysis, data mining, and ETL
- Natural Language Processing (NLTK); text mining, frequency analysis, and visualisation
- Time-series analysis and forecasting (SAS Viya); storytelling with data for technical and non-technical audiences

Software Development Foundations

- Languages: Java, C#, PHP, Python, C++, JavaScript, HTML, CSS
- Program design, OOP, UML, software engineering; Linux; Git; database design (SQL, MySQL, SQL Server, MongoDB)

Cybersecurity Foundations

- ISC2 cybersecurity certifications pathway (in progress) — security foundations, risk awareness, secure practices, and professional ethics

Professional Skills

- Strong problem-solving, ownership, and end-to-end delivery
- Clear communication across technical and business stakeholders
- Attention to detail, adaptability, and cross-functional collaboration

PROFESSIONAL EXPERTISE

Origin CRM — Full-Stack Developer / Product Builder

Current

React, TypeScript, Vite, Tailwind · Node.js, Express · Firebase · Resend / Nodemailer · PDF.js / pdf-lib · Quill · JWT / MFA (TOTP)

Built and shipped a production-ready CRM for sales, operations, and client work — contacts, pipelines, projects, invoicing, document e-sign, notifications, and client-facing portals — with a React SPA and a secure Node API on Firebase.

- Designed and developed an end-to-end CRM covering contacts/organizations, leads, deal pipelines, project boards, activities, and role-based access.
- Built a React + TypeScript SPA with modular routing, permission-aware navigation, and real-time dashboard snapshots from Firestore.
- Implemented a Node.js/Express API with Firebase Admin for authenticated staff flows, public document/scheduling links, email delivery, and background jobs.
- Delivered Smart Docs: Word/PDF import, PDF canvas overlays, public signing links, and high-quality pdf-lib stamped PDF downloads/email attachments.
- Built invoicing & payments tracking, a client portal, and notification systems (in-app + email) with user preferences and document-signed alerts.
- Hardened security with Firebase Auth, MFA (OTP), Storage/Firestore rules, staff-only APIs, and tokenized public document access.

Personal Assistant — Jewel Boutique

Jun 2022 – Present

Hartebeespoort, North West, South Africa

- Provide operational and administrative support in a retail environment, balancing reliability with concurrent product and technical delivery.
- Deliver technical assistance including support for the business Google website presence.

Reference contact: Sipelile — 062 060 9070

EDUCATION

Eduvos — Bachelor of Science in Information Technology: Data Science

2022 – 2025

Undergraduate degree · Completed | Pretoria, South Africa

- Completed undergraduate Data Science degree covering Python and R analytics, data mining and administration, NLP with Python, time-series forecasting, microservices concepts, data visualisation/communication, and research-oriented project work.

- Career-focused qualification with practical foundations in programming (Java, C#, PHP, Python program design), database design and management (MySQL / SQL Server), Linux, software engineering with UML, and technical project work.

SELECTED PROJECTS

Olympic Medal Prediction Model

Sep 2024 – Present

- Collaborative predictive modelling using event performance, GDP, GDP per capita, and population to forecast Olympic outcomes.

UN Declaration Text Analytics

May 2023

github.com/bless-atwork/data_analytics

- Python / Jupyter pipeline for word clouds and frequency analysis of the UN Declaration of Human Rights — NLP preprocessing and visual storytelling.

CreditAccess Website

Sep 2022 – Present

- Web application built in C#, applying object-oriented programming and web development concepts.

HIGHLIGHTS & CERTIFICATIONS

- **Academic:** Block Two Top Achiever — awarded by Eduvos for academic performance.
- **In progress:** ISC2 Cybersecurity Certifications pathway — advancing cybersecurity careers and building employer confidence (foundations, risk awareness, secure practices, ethics).
- **Completed:** Higher Certificate in Information Systems: Software Development; undergraduate Bachelor of Science in Information Technology: Data Science.
